

Turning Point Stabilization and Evaluation Program

Serving Males and Females (12 to 18)

The *Turning Point* program is specifically designed for youth in immediate need of placement for short-term stabilization to avoid psychiatric hospitalization/incarceration and requires a comprehensive evaluation to determine discharge treatment and supervision options.

Services Offered

A comprehensive behavioral health assessment which considers medical, psychological, educational and social factors in evaluating a youth's mental health, academic, social and functional capacity. The program is designed to stabilize the youth and provide a comprehensive diagnostic assessment, outlining treatment and care needs within 30 days.

Turning Point Features

- 3:1 resident to staff ratios 24/7
- 24/7 nursing services
- Accredited **education program**
- Referral and admission services outside of traditional business hours
- Mental health screening
- Risk assessment
- Medical screening
- Initial service plan within 72 hours of placement
- Onsite medical care
- Recreation therapy and life skills training
- Drug and alcohol testing and substance abuse counseling (when indicated)
- Family visitation and engagement are encouraged and supported
- 1:7 Case Manager to youth caseload
- Comprehensive transition plan outlining the level of care and type of treatment services indicated.

Turning Point Professionals

Highly skilled licensed clinicians who embrace a positive psychological philosophy of care and are trained in a trauma-informed approach to the care and treatment of adolescents.

Behavioral Health Assessment

Services include a medical history, physical exam, psychiatric evaluation, psychosocial assessment, psychological evaluation (including objective testing), mental health screen (or personality testing), suicide assessment, substance abuse screening, trauma assessment and a risk assessment for general violence. Other assessments may be utilized, as indicated for issues such as Autism Spectrum Disorder, substance abuse, adaptive functioning and sexual harm.
